Section 4: First aid measures

4.1 Description of the first aid measures

**In case of aspiration**
Due to the vapour pressure, which is low under normal conditions, exposition by inhalation is to be expected mainly if substance is heated. In case of aspiration, provide fresh air to the affected person. In case of respiratory arrest, give artificial respiration.

**In case of skin contact**
Skin contact is considered the most frequent type of exposition to test inks at the workplace. Wash skin with plenty of water and soap.

**In case of eye contact**
As a precaution, rinse eyes with plenty of water.

**In case of ingestion**
Never attempt to give anything by mouth to an unconscious person. Rinse mouth with water.

4.2 Main acute and delayed symptoms and effects
No data available.

4.3 Information on immediate medical help or special treatments
No data available.

Section 5: Firefighting measures

5.1 Extinguishing agents
Suitable: Water spray jet, alcohol-resistant foam, carbon dioxide, solid extinguishing agent
Unsuitable: depending on environment

5.2 Special hazards posed by the substance or mixture
Carbon oxides. Pressure increase, risk of bursting if heated.

5.3 Notes for firefighting
If possible, remove the container from the hazard zone.

Section 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures
Use the specified personal protective equipment. See sections 8. Avoid contact with eyes and skin.

6.2 Environmental precautions
Absorb spilled liquids with universal binder (e.g. diatomaceous earth, vermiculite, sand) and dispose of according to regulations.
Clean soiled items and floors.
Not hazardous to water. Prevent release into the sewers or to the surface and ground water.

6.3 Methods and materials for containment and cleaning up
Absorb spilled liquids with absorptive agents, such as: sand, vermiculite or powdered limestone. Place in suitable, sealed containers for disposal.

6.4 Reference to other Section
Disposal: see section 13
