Pregnant women should absolutely avoid any inhalation and skin contact.

Keep away from food, drink and forage.

Immediately take off all contaminated, soaked clothing.

Store the protective clothing separately.

Avoid contact with eyes and skin

#### Individual protective measures – personal protective equipment

The design of personal protective equipment must be selected depending on the concentration and quantity of hazardous substances specific to the respective workplace. The chemical resistance of the protective equipment should be clarified with the suppliers.

#### Eye / face protection

Wear protective glasses. To protect your eyes, use only eyewear tested and approved according to official standards, such as NIOSH (US) or EN 166 (EU).

#### Skin protection

Wear gloves for work. Check the gloves for intactness before putting them on.

Remove them without touching the outside surface of the gloves to avoid skin contact with this product.

Dispose of contaminated gloves after use in compliance with the statutory regulations and good laboratory practice. Wash and dry your hands.

The selected protective gloves must meet the specifications of the EC Directive 2016/425 and the derived standard EN 374.

#### Gloves

##### Glove material

Butyl rubber, strength: 0.7 mm

The selection of a suitable glove not only depends on the material but also on additional quality features which are different for each manufacturer.

##### Permeation time of the glove material

Permeation value: Level ≥ 6 (>480min)

The exact penetration time must be obtained from the protective glove manufacturer and must be observed.

#### Other skin protection

Impermeable protective clothing. The type of protective equipment must be selected in keeping with the concentration and quantity of the hazardous substance at

#### Breathing protection

Breathing protection is required in case of: formation of aerosol or mist. Type: A (against organic gases and vapours with boiling point > 65 °C, code colour: brown).

The wearing time limits according to GefStoffV in connection with the Regulations for the Use of Respiratory Protective Equipment (BGR 190) must be observed.
