Section 1: Designation of the substance or the mixture, and of the company

1.1 Product identifier
Name of substance / trade name: Test inks 30 – 38mN/m
Product number:
Ink 30: 100034754
Ink 32: 100034755
Ink 34: 100034756
Ink 36: 100034757
Ink 38: 100034758

Other designations:
Test inks

1.2 Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses:
Testing of surface energy on components.

Uses advised against:
Application to hot surfaces.

1.3 Information on the supplier who provides the Safety Data Sheet
Manufacturer / Supplier: Diener electronic GmbH & Co. KG
Address: Nagolder Str. 61
Country ID/PO code/town: 72224 Ebhausen

Contact person for technical information
Mr Christof Diener
Phone / email: +49 74 58 – 999 31 - 542 / info@plasma.com

1.4 Emergency phone

Section 2: Potential hazards

2.1 Classification of the substance or mixture
Classification pursuant to Directive (EC) No. 1272/2008

2.2 Identifying elements
Identifying elements pursuant to Directive (EC) No. 1272/2008
The substance is classified and labelled pursuant to the CLP Directive.

Hazard pictograms

GHS02                      GHS06                GHS07              GHS08

Signal word: Danger

Hazard statements
H226 Flammable liquid and vapour
H302 Hazardous to health if ingested
H331 Toxic to health if inhaled
H360FD May impair fertility May cause harm to the unborn child.
H351 Suspected of causing cancer
H373 May cause damage to organs through prolonged or repeated exposure.

Precautionary statements
P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P271 Use only outdoors or in a well-ventilated area.
P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P308+P313 IF exposed or concerned: Get medical advice/attention.
P403+ P233 Store in a well-ventilated place. Keep container tightly closed.

Additional information:
For commercial users only.

2.3 Other hazards
This substance/this mixture does not contain any components in concentrations of 0.1% or higher which are classified as either Persistent, Bioaccumulative and Toxic (PBT) or very Persistent and very Bioaccumulative (vPvB).

Section 3: Composition/information on components

3.2 Mixtures

Name of substance: 2-Ethoxy-ethanol
EC No.: 203-804-1
CAS No.: 110-80-5
REACH registration no.: There is no registration number for this substance since the substance and its use are exempt from registration, no registration of the annual tonnage is required, or registration is scheduled for a later point in time.
Safety Data Sheet pursuant to Directive (EC) No. 1907/2006

Legend

Section 4: First aid measures

4.1 Description of the first aid measures

In case of aspiration
Provide fresh air. If symptoms occur or in case of doubt, seek medical advice.

In case of skin contact
Skin contact is considered the most frequent type of exposition to test inks at the workplace. Immediately wash skin with plenty of water and soap. If necessary, seek medical advice.

In case of eye contact
As a precaution, rinse eyes with water. If symptoms occur, seek medical advice.

In case of ingestion
Have person rinse their mouth and drink a glass of water. Do not induce vomiting. Seek medical advice immediately and show this container or label.

4.2 Main acute and delayed symptoms and effects
Respiratory distress
Dizziness
Vertigo
Nausea
Vomiting
Headache

4.3 Information on immediate medical help or special treatments
No data available.

Section 5: Firefighting measures

5.1 Extinguishing agents
Suitable: Adapt fire extinguishing measures to the surroundings.
CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol-resistant foam

Unsuitable: depending on environment

5.2 Special hazards posed by the substance or mixture
May form explosive mixtures with air when heated.
In case of fire, formation of dangerous fire gases and vapours possible.
May be released in case of fire:
Carbon monoxide and carbon dioxide

5.3 Notes for firefighting
If possible, remove the container from the hazard zone.
Other information Vapours heavier than air. Pay attention to backfire

Section 6: Accidental release measures
6.1 Personal precautions, protective equipment and emergency procedures

Use the specified personal protective equipment. See sections 8. Avoid contact with eyes and skin. Do not breath in vapour/aerosol.

6.2 Environmental precautions

Dilute with plenty of water. Absorb spilled liquids with universal binder (e.g., diatomaceous earth, vermiculite, sand) and dispose of according to regulations.
Clean soiled items and floors.
Prevent release into the sewers or to the surface and ground water.

6.3 Methods and materials for containment and cleaning up

Absorb spilled liquids with absorptive agents, such as: sand, vermiculite or powdered limestone. Place in suitable, sealed containers for disposal and dispose of according to regulations. Ensure sufficient ventilation.

6.4 Reference to other Section

For information on safe handling, see section 7.
For information on safe personal protective equipment, see section 8.
For information on disposal, see section 13

Section 7: Handling and storage

7.1 Precautions for safe handling

Handling according to the Laboratories Directives (TRGS 526)
Do not leave bottles open.
General hygiene:
- Do not eat, drink or smoke in areas where work is done.
- Wash your hands thoroughly after using the substance.
- Ensure good ventilation/extraction at the workplace.

Fire and explosion protection measures

Keep away from sources of ignition – do not smoke. Take measures to protect from electrostatic charge. Have breathing apparatus equipment available on site.

7.2 Conditions for safe storage, including any incompatibilities

Information on storage conditions

Do not refill inks. Keep in original container only.
Keep containers tightly closed.
Store at room temperature.
Keep in a dry place.
Protect from overheating/warming.
Keep away from sources of ignition.
Store separate from food.

Requirements in storage rooms and containers
Storage class 3 (flammability liquids)
Only substances of the same storage class should be stored together.
Storage of the substance or mixture together or jointly with the following substances is prohibited:
- pharmaceuticals, food or forage, including their additives;
- infectious, radioactive and explosive substances;
- gases;
- other explosive substances of storage class 4.1A;
- flammable solid substances or desensitised substances of storage class 4.1B;
- pyrophoric substances;
- substances which release flammable gases when in contact with water;
- heavily oxidising substances of storage class 5.1A;
- ammonium nitrate and preparations containing ammonium nitrate;
- organic peroxides and self-reactive substances;
- non-combustible acutely toxic substances of storage class 6.1B.
Storing of the substance or mixture together or jointly with the following substances is permitted under certain conditions only (for details, refer to TRGS 510):
- oxidising substances of storage class 5.1B;
- non-combustible substances of storage class 6.1D with toxic or chronic effects;
- combustible solid substances of storage class 11.
The substance should not be stored together or jointly with substances with which hazardous chemical reactions are possible.

Storage together with the test inks 40-105 mN/m is possible without any restrictions.

Storage class: 3

Classification according to the German Health and Safety at Work Regulations (BetrSichV)
Combustible

7.3 Specific end uses

Industry- and sector-specific guidelines
Please refer to our Technical Data Sheet for additional information.
Replacement product with smaller health hazards: Diener non-toxic / coloured test inks

Section 8: Limiting and monitoring exposure / personal protective equipment

8.1 Parameters to be monitored

Limit values for exposure at the workplace and/or biological limit values

Workplace limit values (Arbeitsplatzgrenzwerte, AGW) applicable in Germany

Name of substance: 2-Ethoxy-ethanol; CAS: 110-80-5
Basis: TRGS 900 - Workplace limit values
Value: 7.6mg/m³, 2ml/m³ (ppm)
Peak limit: Excess factor 8 (II)
Duration 15min, average; 4 x per shift, intervals of 1h
Category II – Substances with a resorptive effect
Biological limits  
(biologische Grenzwerte, BGW)  
Germany

Name of substance: 2-Ethoxy-ethanol; CAS: 110-80-5  
Parameters:  
Limit: Ethoxy acetic acid  
50 mg/l  
Material: Urine  
Sampling: With long-term exposure: at the end of a shift after several previous shifts  
Teratogenic: Group B  
Even with compliance with the AGW and BGW, a teratogenic hazard cannot be excluded.

Hazard of resorption  
by skin

Relevant DNEL/DMEL/PNEC and other threshold values relevant for human health

Formamide; CAS: 75-112-7  
DNEL (oral, chronic): Not determined  
DNEL (by skin, chronic) 952 µg/kg  
DNEL (by inhalation, chronic) 6.6 mg/m³

2-Ethoxy-ethanol; CAS: 110-80-5  
DNEL (oral, chronic): Not determined  
DNEL (by skin, chronic) 300 µg/kg  
DNEL (by inhalation, chronic) 83 µg/m³

Values relevant for the environment: (PNEC)

8.2 Limiting and monitoring exposure

Suitable technical control equipment
The usual precautions when handling chemical agents must be applied. Wash your hands before breaks and at the end of work. Do not eat, drink or smoke at the workplace. Pregnant women should absolutely avoid any inhalation and skin contact. Keep away from food, drink and forage. Immediately take off all contaminated, soaked clothing. Store the protective clothing separately. Avoid contact with eyes and skin.

Individual protective measures – personal protective equipment
The design of personal protective equipment must be selected depending on the concentration and quantity of hazardous substances specific to the respective workplace. The chemical resistance of the protective equipment should be clarified with the suppliers.

Eye / face protection
Wear protective glasses. To protect your eyes, use only eyewear tested and approved according to official standards, such as NIOSH (US) or EN 166 (EU).

Skin protection
Wear gloves for work. Check the gloves for intactness before putting them on. Remove them without touching the outside surface of the gloves to avoid skin contact with this product. Dispose of contaminated gloves after use in compliance with the statutory regulations and good laboratory practice. Wash and dry your hands.

The selected protective gloves must meet the specifications of the EC Directive 2016/425 and the derived standard EN 374.

Gloves
Glove material
Butyl rubber, strength: 0.7 mm
The selection of a suitable glove not only depends on the material but also on additional quality features which are different for each manufacturer.

Permeation time of the glove material
Permeation value: Level ≥ 6 (>480min)
The exact penetration time must be obtained from the protective glove manufacturer and must be observed.

Other skin protection
Impermeable protective clothing. The type of protective equipment must be selected in keeping with the concentration and quantity of the hazardous substance at.

Breathing protection
Breathing protection is required in case of: formation of aerosol or mist. Type: A (against organic gases and vapours with boiling point > 65 °C, code colour: brown). The wearing time limits according to GefStoffV in connection with the Regulations for the Use of Respiratory Protective Equipment (BGR 190) must be observed.

Limiting and monitoring environmental exposure
Prevent release into the sewers or to the surface and ground water.

Section 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Optical appearance
- Aggregate state: Liquid
- Colour: Red

Odour: Like ether - ammonia
Odour threshold: Not determined

pH value:
- Ink 30: 7.5
- Ink 32: 7.5
- Ink 34: 7.0
- Ink 36: 7.0
- Ink 38: 7.0

Melting point / freezing point: Not determined

Initial boiling point and boiling range:
- Ink 30: 136 °C
- Ink 32: 153 °C
- Ink 34: 156 °C
- Ink 36: 166 °C
- Ink 38: 175 °C

Flash point:
- Ink 30: <60°C
- Ink 32: <60°C
- Ink 34: <60°C
- Ink 36: 64 °C

Evaporation rate: Not determined

Flammability (solid, gaseous): Not applicable

Upper/lower flammability or explosion limits: Not determined

Vapour pressure: Not determined

Vapour density: Not determined

Relative density:
- Ink 30: 0.922
- Ink 32: 0.968
- Ink 34: 0.999
- Ink 36: 1.030
- Ink 38: 1.050

Solubility: Soluble in water
9.2 Other data
Surface tension 30 - 38 mN/m at 20 °C

Section 10: Stability and reactivity

10.1 Reactivity
Vapours may form an explosive mixture with air

10.2 Chemical stability
Under normal environmental conditions and the temperature and pressure conditions to be expected during storage and handling, the material is stable.

10.3 Risk of hazardous reactions
Exothermal reaction with: alkalis, oxidation agents
Risk of explosion: phosphoroxide, hydrogen peroxide

10.4 Conditions to be avoided
Heat, flames, sparks and hot surfaces. Temperatures above 140 °C

10.5 Incompatible materials
Strong oxidizing agents, strong acids, aluminium, light metals and copper

10.6 Hazardous decomposition products
Hazardous combustion products: see sections 5.

Section 11: Toxicology

11.1 Information on toxicological effects
Acute toxicity

2-Ethoxy-ethanol; CAS: 110-80-5
LD50 (oral, rats): 500mg/kg (conversion value)

Formamide; CAS: 75-112-7
LD50 (oral, rat): 5,325 mg/kg (published value ECHA source 1)

ATE\textsubscript{mix} LD50 oral

| Ink 30 | 500mg/kg |
| Ink 32 | 553mg/kg |
| Ink 34 | 658mg/kg |
| Ink 36 | 813mg/kg |
| Ink 38 | 1,028mg/kg |

2-Ethoxy-ethanol; CAS: 110-80-5
LD50 (by skin, rabbit): 3,300 mg/kg (published value, source 3)

Formamide; CAS: 75-112-7
LD50 (by skin, rabbit): 17,000 mg/kg (published value, source 1)

ATE\textsubscript{mix} LD50 by skin

| Ink 30 | 3,300mg/kg |
| Ink 32 | 3,605mg/kg |
| Ink 34 | 4,196mg/kg |
| Ink 36 | 5,019mg/kg |
| Ink 38 | 5,843mg/kg |

2-Ethoxy-ethanol; CAS: 110-80-5
LC50 (by inhalation, vapour, rat, 4h): 3mg/l (conversion value)

Formamide; CAS: 75-112-7
LC50 (by inhalation, vapour, rat, 4h): 21 mg/kg /l (published value ECHA source 1)

ATE\textsubscript{mix} LC50 by inhalation, vapours

| Ink 30 | 3 mg/l |
| Ink 32 | 3 mg/l |
| Ink 34 | 4 mg/l |
| Ink 36 | 5 mg/l |
| Ink 38 | 6 mg/l |

Burning/irritating effect on the skin
The mixture has not been classified. Minor irritation is possible.

Hazard of resorption by skin

Severe eye damage/irritation
The mixture has not been classified. Minor irritation is possible.
Sensitising of the respiratory tract/skin
The mixture has not been classified. The mixture does not contain any substances classified as sensitising.

Germ cell mutagenicity
The mixture has not been classified. The mixture does not contain any substances classified as mutagenic.

Carcinogenicity
Suspected of causing cancer. The inks 32 – 38 contain a component classified as category 2 (suspected of causing cancer), which is present in a concentration of more than 1%.

Toxicity to reproduction
May impair fertility.
May cause harm to the unborn child.

Specific target organ systemic toxicity with single exposure
The mixture has not been classified. The mixture contains no substances classified as specifically target organ systemic toxic with single exposure.

Specific target organ systemic toxicity with multiple exposure
May cause damage to organs through prolonged or repeated exposure.
The inks 32 – 38 contain a component classified as category 2, which is present in a concentration of more than 10%.

Aspiration hazard
The mixture has not been classified. The mixture does not contain any substances classified as hazardous on aspiration.

Symptoms and effects (delayed and chronic) with information about type of exposure

After inhalation of large amounts
Vertigo
Headache
Unconsciousness

After ingestion of large amounts
Nausea
Vomiting

After resorption of large amounts
Loss of consciousness
Liver and kidney damage. Loss of postural reflexes and ataxia (lack of voluntary coordination of muscle movements).

Section 12: Ecological information

12.1 Toxicity
2-Ethoxy-ethanol; CAS: 110-80-5 (published value ECHA source 2)
Toxicity to fish (LC50, 96h): 10 g/l
Toxicity to daphnia (EC50, 24h): 10 g/l
Toxicity to algae (NOEC, 72h): 1 g/l
Toxicity to micro-organisms (ECO, 24h): 10 g/l

Formamide; CAS: 75-12-7 (published value ECHA source 1)
Toxicity to fish (LC50, 96h): 6,569 g/l
Toxicity to daphnia (EC50, 48h): 500 mg/l
Toxicity to algae (NOEC, 72h): 125 mg/l
Toxicity to micro-organisms (EC50, 30min): 1 g/l

12.2 Persistence and degradability
Biological degradability: 90-100 % / 28d (OECD 301E)
Readily biodegradable

12.3 Bioaccumulative potential
Due to the n-Octanol/water partition coefficient, accumulation in organisms is not to be expected.

12.4 Mobility in the soil
Formamide; CAS: 75-12-7
The adsorption coefficient standardised for organic carbon 0.177

12.5 Results of PBT and vPvB assessment
PBT: Not applicable.
vPvB: Not applicable

12.6 Other adverse effects
No other relevant information available.

Section 13: Disposal considerations

13.1 Waste treatment methods

Treatment of contaminated packages
Have residual volumes and non-reusable solutions disposed of by a recognized disposal company. Dispose of the content/container in keeping with the local/regional/national/international waste disposal regulations.

Waste code according to List of Wastes Regulation (LoW) 070104* (other organic solvents, washing liquids & mother liquors)
Non-cleaned packaging
Non-dried out packaging containing residues must be disposed of as containers containing hazardous residues.
150110 (Packages contaminated with hazardous substances or containing residues thereof)
Cleaned packaging
Non-contaminated, clean packaging can be recycled. Glass waste. Recommended cleaning agent: water

Special precautions
The product and its container must be disposed of as hazardous waste.

Appropriate EU or other regulations
The allocation of a waste code number in accordance with the European Waste Catalogue (AVV) is to be carried out in consultation with the regional waste disposal company.
Section 14: Transport information (source 4)

14.1 UN number
    UN 1992

14.2 UN proper shipping name
    ADR/RID
